To whom it may concern,

We first started using DIB Australia in 2012 after receiving information about the Epson interactive projector from DIB. Gabi demonstrated to the staff how this projector could be used effectively in our classrooms and we made the decision to have DIB install one into one of our classrooms. It was DIB's good pricing and excellent service which influenced our decision from the quotes we had received. Since then, we have had further interactive projector installations matching our original setup.

Our Solutions Consultant, Gabi, provided us with outstanding service. She is very friendly, approachable and always got back to me when I called her or asked for her help. We found that the management of the installation was done very well. The installation was completed within the time frames we had been given and the technician, Andy, also worked well around the movement of children in and out of the classroom with minimal disruption to our program. He was very helpful and ready to help and discuss with teachers what was going on.

We hope to be able to use DIB again in the near future and would not hesitate to recommend them to others considering new installations. Thank you to all the DIB staff for always being so friendly and patient.

Yours sincerely,

Niky Corfios
IT co-ordinator, Teacher
