

4th September 2009

To whom it may concern,

We recently used the services of D.I.B. Australia to install Epson multimedia projectors and 2Touch interactive whiteboards in many rooms at our St Kilda campus. We chose D.I.B. Australia to supply and install the products we selected as they had previously completed installations at our Balaclava campus and we knew the quality of work they did, and that they'd provide a professional installation.

We found dealing with D.I.B.'s personnel to be very easy. The sales consultant offered a range of solutions at various price points and specifications, and made recommendations as to what was best suited to our requirements and would be future proof.

The installation process went really well. D.I.B. worked with us to schedule works so that we could clear rooms at appropriate times and cause minimum disruption to our operations. The installers did a very professional job and called at lunch time each day to discuss their progress and plan the following day's activities.

Overall, D.I.B. Australia did a really professional job. We are happy with the results and would ask D.I.B. to come and quote again on jobs as they arise in the future.

Yours sincerely,

Digby Holmes

AV Manager
