

MACLEOD COLLEGE

A STATE P~12 SCHOOL

12th February 2010

To whom it may concern,

D.I.B. Australia recently installed a Sanyo WXGA projector with Joey Lite controller in the college's Impact Theatre.

Bianca Hargrave from D.I.B. was very friendly and helpful, and her prior experience working in education gives her insight into types of equipment that could be used for certain rooms and for specific purposes. Bianca gave thorough explanations and always followed up promptly with advice and quotes, which was greatly appreciated.

When it came to the installation, Mel communicated all relevant details clearly by phone and with a follow up e-mail. A technician visited the college with Bianca to see the theatre prior to the installation, and everything went well when the technician returned to carry out the works. The technician was friendly and left the area clean and tidy.

The theatre is constantly used by teachers to show movies, and for students to present their own short movies and other digital work created during the year. It is also our main meeting and presentation room for staff meetings and professional development.

The Installation of the Joey Lite has eliminated the need for remote controls and provides staff with an easy to use system.

Yours sincerely,

Simone Hale
ICT/Network Leader
