Late last year we approached D.I.B Australia, and Solutions Consultant Sam Garden came to our school to discuss the installation of a projection system into one of our classrooms. Sam did a great job and was able to offer us a fairly comprehensive picture of what we could or more importantly should do with our room, as we definitely needed guidance! Based on his good consultation and the amount of options available in their Installation Catalogue it gave us the impression that D.I.B had been doing this for a while and thus we chose them to complete the works. Likewise, Production Manager Mel Garden was on the ball with fitting the install into our odd schedule. We are very pleased with the end result, with the technicians James and Jason making every effort to hide the cabling which is obviously important to the look of our premises. We would be happy to call upon D.I.B for other future installs.
