Re: Interactive whiteboard and projector installation

To Whom It May Concern:

D.I.B. Australia was recommended to us by our architect and subsequently installed interactive whiteboards, short-throw projectors and control systems in classrooms at St. Dominic's Primary School.

We found D.I.B.'s consultant to be thoughtful and professional, and they offered a range of options to consider, both in terms of functionality and technical specifications.

We received the excellent recommendation to, and did get D.I.B. to rough-in the cabling during the building works stage. D.I.B. then returned to fit the equipment when the building was complete and this greatly enhanced the quality of the installation finish.

Andy who worked on the installation was very approachable; he developed a good rapport with the builders and went through everything thoroughly.

We found that D.I.B. Australia have excellent processes and procedures in place and will be using them for further interactive whiteboard and projector installations shortly.

Yours sincerely,

Anthony (Tony) Levett
Principal
