# Sacré Cœur

To whom it may concern,

Sacré Cœur has employed DIB Australia's services for almost 11 years and during that time they have collaborated with the school on a large number of projects, of varying scope. These have ranged from fitting theatres, various classroom installations and technology updates across the school. The relationship between Sacré Cœur and DIB has been positive, as the quality of service, products and installations has been reliable and successful.

The school's most recent installations occurred over the Christmas period 2016/17 and consisted of the refurbishment and repurposing of classrooms. These classrooms needed an upgrade and DIB was engaged to help decide what audio-visual equipment could be repurposed, what equipment needed to be replaced and find what innovative technologies would enhance the refurbished spaces. DIB was working on-site as the classroom construction was being completed; this required some latitude in the scheduling of DIB's audio-visual installations, to ensure that the upgrades were completed in an efficient and timely manner. This flexibility and the reliability of DIB's production department, overseen by Mel Garden, was excellent. She worked around tricky time schedules to ensure that the project reached completion as soon as was possible. The installation was seamless and any issues we isolated were promptly remedied.

Sam Garden, Sacré Cœur's DIB Sales Consultant, has a very good understanding of our site. His proposed suggestions were always carefully calculated, as he has a thorough understanding of products suitable to classroom installations. He provided plenty of suggestions, underpinned with an understanding of the school's aims.

Kind regards,

Stephen Benko  
AV/Library Technician  
Sacré Cœur
