RE: DIB Australia Interactive Projector Classroom Installations

To Whom it May Concern

Box Hill High School has had DIB Australia as our preferred AV supplier for a number of years now. During this time they have completed numerous classroom installations throughout the school and have also provided service works for our installed audio visual equipment.

We continue to choose DIB Australia as we have found that the consultants always take into consideration our needs based on past acquisitions, present needs and future developments. Sam Garden offers excellent technical solutions in particular, because he looks at the big picture and clearly explains the reasons for his suggestions taking into account new technologies and our budget restrictions.

Our most recent classroom installations have included Epson's interactive projectors, speakers and Joey control systems. We have been able to develop a customised yet common feel to our installs, with our needs always being met through the thorough consultation process.

Booking of the install technicians is always worked around us ensuring that there is minimal disruption to the school's schedule. The installers clean up afterwards, do a final check, complete the paperwork and talk to us about the equipment when we require explanations.

I know that not only can I rely upon their service calls should the need arise, but that I can always trust a DIB install to run smoothly and that the quality of the installs will be reliable, efficient and neat.
