Reference for DIB

Mackillop College has utilised DIB's services for over 2 years for the installation and maintenance of all of our Audio Visual equipment. Over this period, DIB have supplied and installed nearly 30 interactive devices, ranging from the 2Touch IWB's to the Epson Interactive Data Projectors; plus a varying range of digital signage solutions.

During this time, I have been impressed with DIB's commitment in ensuring that all works are completed to specification and on time. In particular, their installers take pride in the quality of their work, ensuring that installations are both pleasing to the eye and fully functional, before leaving a job. Clean up after the job is the norm.

With respect to project planning and management, DIB's office team are always keen to assist and they keep me regularly informed on the project's progress. Their knowledge and experience with Audio Visual Technologies is always up to date and informed, and I hold the highest regard for their expertise with these technologies.

DIB's after sales service is both reliable and timely and they are able to offer 'loan equipment' for IWB's if a warranty claim is required.

In summary, I would not hesitate in recommending DIB to any school/organsiation looking for a reliable and competent Audio Visual Supplier.

Guy Anderson  
(Systems Manager)
