Re: Epson EB-450Wi Interactive projector installations

To Whom It May Concern:

We recently asked D.I.B. Australia to quote for the installation of Epson EB-450Wi interactive projectors in six classrooms in the school.

D.I.B. was recommended to us by one of our parents who is a teacher at another school. We were very happy with Bianca Hinkley, D.I.B.'s Solutions Consultant as she explained everything in layman's terms. Bianca was great and responded quickly with quotes and made time to come out to the school when we needed to see her. She also provided training for our staff and demonstrated the many aspects that this interactive projector is capable of.

Andy the installer was great. He made up mounting blocks on which the projectors were installed in rooms where the whiteboards sit out from the wall, ensuring the projector's image is projected onto the board correctly. The installers were great and had the work done quickly and neatly. Andy took us through operating the projector and provided advice when needed.

At all times, D.I.B staff would return calls when messages had been left and this was done in a timely fashion

We have found the interactive projectors have been well received by the teaching staff and provide a viable, cost-saving alternative to an interactive whiteboard.

Yours sincerely,

David Luke
