D.I.B Australia Reference

D.I.B Australia has been a supplier of audio visual equipment to our school for a number of years. We recently had a requirement to install 16 interactive whiteboards in various classrooms. After researching various whiteboard products available we chose D.I.B Australia and their 2Touch Interactive Whiteboard solution. We were very impressed with the quality and durability of the board as compared with other products on the market. We also valued the practical demonstration of this "2Touch" whiteboard solution undertaken by their salesman Scott.

D.I.B provided a professional installation of these whiteboards and their installer Jason was very helpful in ensuring we were fully satisfied with the completed project.

DIB has provided excellent after sales support and have always been available at short notice to resolve any minor issues we have experienced with our new Interactive whiteboards.

We would be happy to use D.I.B again in the future for our audio visual needs.

Yours sincerely,

Matthew Polack

IT. Coordinator, Good Shepherd Lutheran Primary School.
