31 October, 2008

We recently installed 2Touch Interactive Whiteboards into two of our school classrooms. D.I.B were referred to us and subsequently chosen to do the install based on their good product and service. Our Solutions Consultant Scott gave a very clear representation of what the boards would bring to the classroom and all our questions were well answered. The scheduling of the job was fine and all went well. Dealing with tech Andy was very easy, everything was correctly installed and the communication on times and access arrangements was great.
