We contacted DIB in 2013, for the first time, when we needed to install interactive whiteboards into new locations across the school. We were genuinely delighted by the ease and professional approach of the company. They listened to our needs, provided clear advice and planned for the installation during our holiday period. There was frequent liaison with the school technicians and everything ran like clockwork. Their communication was impeccable and prompt and the price was competitive.

Gabi Celiga was highly knowledgeable and her product knowledge has been invaluable to us. She visited the school to gain a thorough knowledge of our needs and even provided effective trouble shooting for our problems with our original IWB's. The teachers attended a handover session with Gabi and gained a lot of support to get the best use out of the equipment. We have not required after sales support for DIB products but I am confident that when we have any issues that they will help us to solve them.

The whole experience was worry free and I will certainly be approaching the company again for future needs. They certainly earned our recommendation for audio visual equipment.

Trish Bostock

Assistant Principal
