

CAROLINE  
CHISHOLM  
CATHOLIC COLLEGE

11 September 2014

To whom it may concern,

The College has had a long term relationship with DIB Australia spanning over 8 years. It was the attention to detail provided in all aspects of the job which influenced our decision to go with DIB initially and have remained close to them as our main audio visual service provider since then.

Works have included Hall, Theatre and general classroom projector and audio installations, DVC installation, interactive projector upgrades as well as various service works. Recently, the College study centre was refurbished and now offers a presentation space. We called upon DIB to provide us with two motorised projector screens with drop down projectors that are able to display either individually or clone, good audio and the capacity for microphones including two wireless microphones.

Sam worked well through a number of concept versions to give the College the best possible outcome. The capacity of DIB to arrange this project with limited timelines and quality technicians was impressive. Andy's attention to detail during the installation and liaison with College staff was excellent.

Yours sincerely,

John Pahlow  
Deputy Principal  
Caroline Chisholm Catholic College
