Integrated Solutions

Leviton AV Controller is All business in the Boardroom.

Leviton AV installations for conference rooms can adapt to handle future multimedia devices while maintaining a low profile in the room.

The Leviton AV controller can help control simple televisions to complex designs with sound reinforcement and education training recording systems. All this can be controlled with nothing more than a tablet and an app.

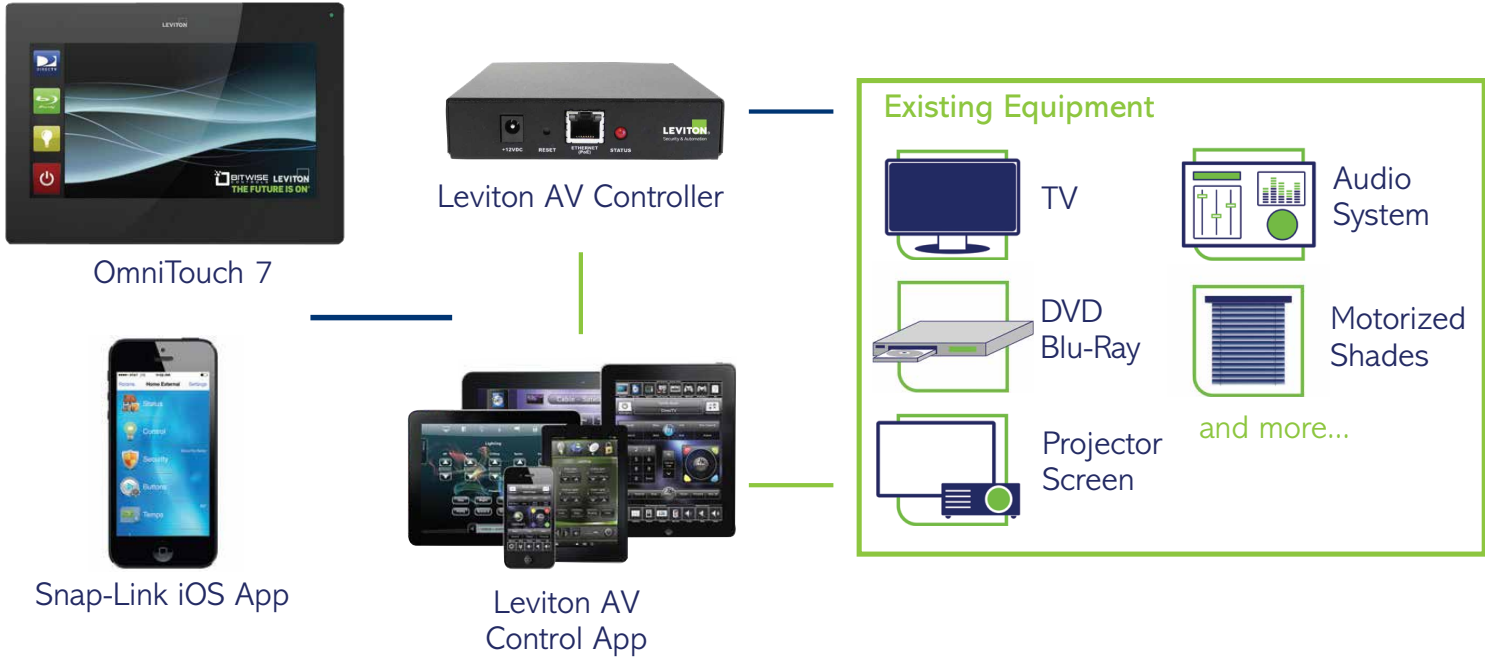

Leviton AV Controller

- Supports two-way interaction with one serial or networked interface.
- On-board relays and signal sensing ports allow interaction with mechanical devices.
- Built-in macro storage.
- Features 4 IR ports plus 1 IR-Blaster.
- Native integration with Omni security & automation controllers, including OmniTouch 7 graphics package
- Free integration modules for Hi-Fi distributed audio and Omni-Bus lighting control

Leviton AV Controller solution

Leviton AV Controllers are designed for customizable control of sub-systems within home theaters, retail, restaurants, boardrooms, classrooms, houses of worship, and much more. Create custom interfaces for OmniTouch 7, iOS, and Android devices, ensuring complete end-user satisfaction. A host of accessories

including Wi-Fi connectivity rounds out the product offering. The controller allows the other systems in your home to interact with one another. Since each controller is connected to your network, your system can scale from a single room to an entire home or building.

Leviton Audio Visual Control Box

LEV-BWBC4-NT - Leviton AV Control Box - HTX - 2

Control AV equipment, motorized screens, window coverings, lighting, and other components the BWBC4 serial ports, IR ports, I/O ports, and relays.
