LEADERS IN AUDIO VISUAL CONTROL, COMMBOX AND LEADERS IN MOBILE MANAGE RADIX VISO HAVE COLLABORATED TO PRODUCE COMMBOX MANAGE.....

commBOX

MANAGE

CommBox Manage is an easy to use cloud platform that allows IT and AV managers to centrally monitor, manage and support CommBox touchscreens and displays wherever they are. Not only that, CommBox Manage is compatible with other devices such as laptops, tablets, mobile devices and more.

KEY MODULES

REMOTE SCREEN CONTROL 1:1

EASY DELPOYMENT & ENROLLMENT

POLICY & SETTING

REPORTING

KIOSK MODE

SUPPORTS MANY TYPES OF DEVICES & OS

SOFTWARE DISTRIBUTION & MANAGEMENT

SIMPLE MESSAGING

SERVING MULTIPLE LEVEL ADMINISTRATION

Department Level

Region Level

School Level

KEY BENEFITS

- Bundled free with new CommBox Interactive and Display Screens
- One central cloud based platform for all devices
- Supports the needs of all key stakeholders from users through to IT Managers and Executives
- Tailored for all devices and already integrated with major manufacturers
- Simple to add to your existing fleet of CommBox V3 screens.

KEY FEATURES

- Centrally manage firmware updates, apps, OS settings
- Apply and enforce policies and regulations
- Install applications and updates on all devices remotely
- Simplify batch tasks and simultaneous workflows
- Schedule actions at predefined times
- Take remote control over devices for assistance

- Group and tag devices according to predefined criteria
- OTA updates and firmware management
- Analyze device, network and app usage to make fact-based decisions
- Lock, track and wipe lost or stolen devices
- Broadcast alerts and notices to all or selected devices

Remote Control Management

Perform technical support tasks without limits, control remote clients and assist users. Work alongside or take over the screen, share files, execute remote shell commands and much more.

CommBox Manage provides help desks the ability to control devices remotely, get a real-time view of the device screen along with full "touch control" capabilities including keyboard and mouse control. Manage remote control situations without geographic limitations yet maintain maximum security, speed and quality.

Operating directly from the CommBox Manage web console, remote controlling a device requires no software installation - simply log in and connect to your remote devices from any browser.
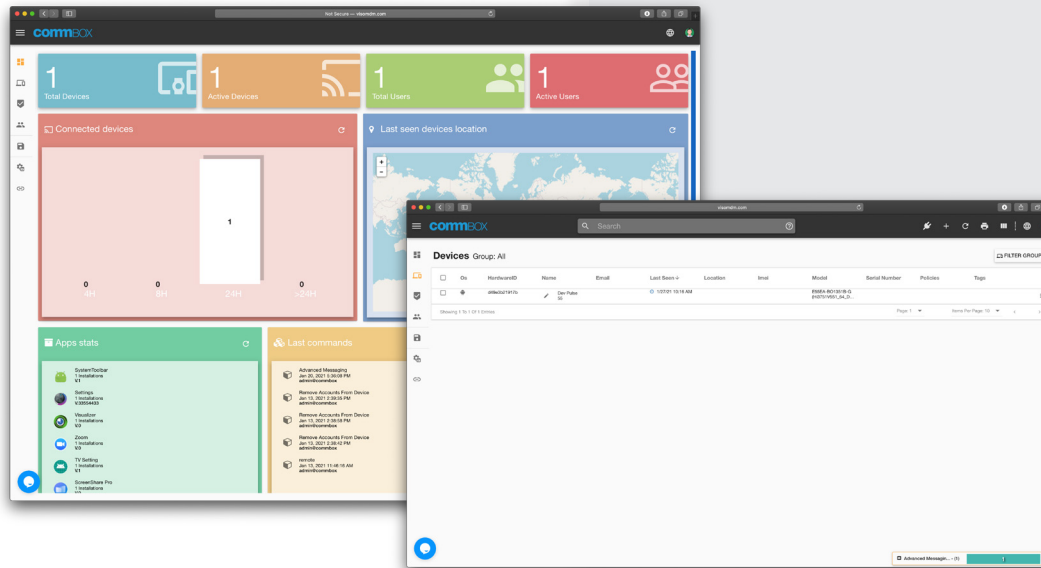

Easy Deployment & Enrolment

CommBox Manage helps you deploy devices in batches. Execute preset device configuration and settings, automate enrollment tasks by groups and roles and have your devices ready to use from the moment they are taken out of the box. All new devices can be automatically configured the first-time they are connected to a network, according to your predefined setup plan and scheme - without user intervention.

Support Any Type Of Device & OS Environment Form Factor

SMARTPHONES, TABLETS, LAPTOPS, VR/AR DEVICES, WEARABLES AND CUSTOM HARDWARE.

In today's world, you need a platform that responds to changes and market trends, enabling you to seamlessly add more devices to your fleet. Whether you are an IT administrator supporting thousands of devices or a teacher in a small classroom, chances are that you have more than one type of device under your management.

CommBox Manage gives you this peace of mind knowing that whatever your device type is and whatever form factor you choose, we got you covered.

Reporting

Make your decisions based on facts and the most up-to-date information. Create detailed usage reports that include software, location, internet and device usage.

CommBox Manage platform is equipped with a reporting module enabling stakeholders to generate reports and make decisions based on facts.

For example, IT admins, principals and project managers, can generate detailed device usage reports to analyze and optimize device usage across their organization, resulting in better management of resources.

Reports can be based on triggers and filters, compared by geographic and device-level criteria.

Web browsing reports can be transformed to filtering and blocking scheme or used for educational purposes.

COLLECT SOFTWARE AND HARDWARE USAGE STATISTICS

MAXIMIZE RESOURCES AND SECURE ROI WITH AUTOMATIC INVENTORIES

EASILY CREATE DETAILED TEXTUAL AND GRAPHICAL REPORTs

APPLY ADVANCED FILTERS ON COLLECTED REPORTS

STORE, MANAGE, PRINT AND EXPORT REPORTS

Simple Messaging

CommBox simple messaging is a communication and messaging system to send daily and/or emergency notifications.

It allows you to send customized messages to a single, group or all devices from the device CommBox Manage platform or from a personal phone of authorized individuals.

The options are limitless, from greeting students and notifications of a change in class location to emergency notification with instructions on how to act. Messages are very engaging and can include a sound, voice recording, video feed and customized images and backgrounds.

Messages can be triggered automatically according to location, policy and predefined scenarios.

ENGAGING, VISUALLY ENHANCED FULL-SCREEN MESSAGES

CREATE UNLIMITED MESSAGE TYPES (ALERTS, GREETINGS, ANNOUNCEMENTS ETC.)

INCLUDE SOUND, INSTANT RECORDINGS AND ALARMS AS NECESSARY

SEND DIFFERENT MESSAGES ACCORDING TO GEOGRAPHIC LOCATIONS

BI-DIRECTIONAL INTERACTION BETWEEN THE DEVICE AND CENTRAL MANAGEMENT

ALLOW DIFFERENT STAKEHOLDERS TO ACTIVATE MESSAGE SCENARIOS DIRECTLY FROM THEIR PHONES

INTEGRATE TO COMMBOX SIGNAGE

Policy & Setting

Tweak device configurations and settings to align with your policy and use-case. Apply hardware and OS restrictions

CommBox Manage helps to make your device usage effective and tweaked to your requirements. You can define multiple operation modes, tune device settings to predefined use cases and scenarios, impose device functionality. Settings and configurations can be applied to kiosk modes and as part of the profile configuration (as mandatory settings or one-time config)

CONFIGURE UNLIMITED MODES AND OPERATION SCENARIOS

SET DEVICE USAGE TO MISSION

IMPOSE SECURITY AND USAGE POLICIES AND SETTINGS

LIMIT SOFTWARE INSTALLATIONS AND USER-CONFIGURED DEVICE SETTINGS

RESTRICT DEVICE USAGE THROUGH SCHEDULES OR TRIGGERS

RESTRICT ACCESS TO LOCAL AND EXTERNAL STORAGE

ENABLE OR DISABLE WI-FI AND OTHER HARDWARE ELEMENTS

Kiosk Mode

Make your CommBox devices mission-oriented, optimally configured and locked down to a secured kiosk mode. Prevent all unwanted operations except predefined tasks.

CommBox Manage streamlines the implementation of multi app kiosk mode by switching devices to encapsulated environments with predetermined functionality and device look and feel, locking down external ports, hardware elements and applications, and preventing user interaction, except whitelisted applications and relevant hardware elements. You can manage multiple kiosk mode devices centrally, monitor activities, collect reports and implement policy and security measures.

CREATE ENCAPSULATED ENVIRONMENTS BASED ON PRE-CONFIGURED POLICIES

LOCKDOWN INFORMATION KIOSKS IN SECONDS

MULTI APP KIOSK MODE

SINGLE-APP KIOSK MODE

CREATE CUSTOMIZED DESKTOP ENVIRONMENTS

LIMIT INTERNET USAGE

LIMIT SOFTWARE INSTALLATIONS AND DEVICE SETTINGS

ENABLE OR DISABLE WI-FI AND OTHER HARDWARE ELEMENTS

Software Distribution & Management

CommBox Manage enables the distribution and deployment of software.

Installation and update are done from a central repository or from the CommBox store. Deployment can be done to single or multiple devices in a predefined schedule or on the fly.

Installation is done silently and without any user intervention. Once finished, a detailed report is generated.

CREATE PRIVATE APP-STORES WITH WHITELISTED APPS

PUSH AND INSTALL/UNINSTALL APPS AND FILES SILENTLY

CREATE LOCAL NETWORK REPOSITORIES TO REDUCE NETWORK TRAFFIC

SCRIPTS AND BATCH FOR FULL AUTOMATION

DEPLOY APPS SELECTIVELY ACCORDING TO PREDEFINED CRITERIA

CREATE A CENTRAL REPOSITORY AND DEPLOYMENT ON THE COMMBOX MANAGE SERVER
